LANGUAGES

- English
- Hindi
- Gujarati

A passionate and dedicated front-end developer. I am constantly learning and staying updated with the latest trends and technologies in web development to ensure that I can deliver the best possible results .

PERSONAL PROJECT

Meal Finder Website (JavaScript)

- Meal Finder is a web application that allows users to search for meals and view detailed information about them.
- It uses the [TheMealDB API](#) to fetch meal data.

Movie Seat Booking Website (JavaScript)

- A simple movie seat booking system that allows users to select a movie, choose seats, and see the total cost.
- The selected seats and movie are saved in local storage to persist between page reloads.

employee management Website (BootStrap)

- This project is a web-based Employee Management System (EMS) that allows users to manage employee details, view job listings, and navigate through a dashboard.
- It is designed with a clean and responsive interface using Bootstrap.
