Date: 01-Nov-2024 to 30-Sep-2025

- Technical Analysis & Forecasting (Trendlines, Patterns, Indicators)
- Options Market Research (Greeks, IV Skew, OI Analysis)

A passionate and dedicated front-end developer. I am constantly learning and staying updated with the latest trends and technologies in web development to ensure that I can deliver the best possible results .

SKILLS

- ReactJS
- JavaScript
- Bootstrap
- SQL
- CSS
- HTML

PORTFOLIO PROJECT

Meal Finder Website (JavaScript)

- Meal Finder is a web application that allows users to search for meals and view detailed information about them.
- It uses the TheMealDB API to fetch meal data.

Employee Management Website (BootStrap)

- This project is a web-based Employee Management System (EMS) that allows users to manage employee details, view job listings, and navigate through a dashboard.

Calculator (ReactJS)

- Developed a responsive calculator using React.js with component-based architecture. Implemented React Hooks (useState) to dynamically update and display input values. It supports basic arithmetic operations (+, -, *, ÷), real-time expression evaluation, and input clearing with an intuitive UI styled using CSS Modules.

Personal Project

Python Based Analytical Tool

- Built interactive Dashborad for intraday options trading system using real-time Greeks through Upstox API. The system tracks 40+ strikes, computes volatility divergence, and generates quantitative buy/sell signals.
