- Gujarati

PERSONAL PROJECT

Meal Finder Website (JavaScript) ⬈

- Meal Finder is a web application that allows users to search for meals and view detailed information about them.
- It uses the TheMealDB API to fetch meal data.

Movie Seat Booking Website (JavaScript) ⬈

- A simple movie seat booking system that allows users to select a movie, choose seats, and see the total cost.
- The selected seats and movie are saved in local storage to persist between page reloads.

Employee Management Website (BootStrap) ⬈

- This project is a web-based Employee Management System (EMS) that allows users to manage employee details, view job listings, and navigate through a dashboard.
- It is designed with a clean and responsive interface using Bootstrap.
